PROFESSIONAL EXPERIENCE

UI Health | Web Developer | Chicago, IL, USA

Sept 2025 – May 2026

- **Business Overview:** UI Health manages healthcare and academic operations across multiple internal systems. Faculty, residency, scheduling, and departmental data needs to stay accurate and in sync across all of them.
- **Responsibilities:**
 - Extended and maintained a Node.js sync pipeline across multiple systems, adding validation, handling edge cases, and supporting new data types and systems.
 - Modernized legacy workflows (patient appointment scheduling, event registrations, academic registrations) into React applications using specification-driven development, delivering better UX, WCAG-compliant accessibility, and reliable cross-browser performance.
 - Improved frontend performance using memoization, lazy loading, debounced search & filter workflows, & graceful handling of inconsistent API responses.
 - Built Chart.js dashboards to help departments monitor scheduling conflicts, residency coverage, and faculty operations.
 - Accelerated development across all workflows using Claude Code for code generation, debugging, and navigating large existing codebases.
- **Technologies:** Node.js, JavaScript, REST APIs, Chart.js, Claude Code, Figma, WCAG, CMS, Lazy Loading, Memoization

LPS Health | Frontend & Workflow Lead | Internship | Chicago, IL, USA

May 2025 – Aug 2025

- **Business Overview:** A cardiovascular health & wellness platform focused on preventive care, educational content, community engagement, and donations.
- **Responsibilities:**
 - Replaced a legacy frontend with a modern React architecture as the sole developer in 3 months, using specification-driven development with Github Copilot & Claude to deliver the full rebuild independently.
 - Improved Lighthouse score from 40 to 80 and reduced page load time by 70% through lazy loading, image optimization, caching, debounced form handling, and WCAG focused accessibility redesign decisions.
 - Built secure Stripe Checkout workflows with validation, session management, payment recovery handling, and rate limiting to improve donation reliability and prevent invalid transaction states.
 - Used Google Analytics to track bounce rates and time on page across health articles to identify underperforming content, and monitored search term data to improve SEO visibility.
- **Technologies:** React, Tailwind CSS, JavaScript, Stripe API, Google Analytics, GitHub, Netlify, Lazy Loading, Lighthouse, Github Copilot, Claude

Oracle | Cloud Analyst (Frontend Developer - Oracle Fusion Cloud) | Bengaluru, Karnataka, India

Aug 2022 – June 2024

- **Business Overview:** Oracle Fusion Cloud builds enterprise applications for large-scale business operations. Contributed to two products for Berkshire Hathaway Energy, a large energy and utilities company: BHE-HCM, an HR platform managing payroll, scheduling, employee records, and absence management, and BHE-CX Services, an operations platform handling field service, work orders, asset maintenance, and inspections.
- **Responsibilities:**
 - Built Redwood-style enterprise interfaces for BHE-HCM and BHE-CX workflows (payroll approvals, employee scheduling, absence management, work orders, inspections, and asset maintenance operations), supporting daily workflows for employees and field service teams across a large-scale energy organization.
 - Built reusable components for HCM and CX workflows that were adopted across enterprise projects, ensuring UI consistency and cutting redundant dev work.
 - Engineered API integration layers with structured validation and secure REST interactions across distributed Oracle Fusion modules.
 - Collaborated with backend and QA teams during Agile Scrum release cycles to debug cross-module workflow failures and resolve 100+ production issues across frontend and API layers.
- **Technologies:** Oracle VBS/VBCS, Redwood, JavaScript, HTML, CSS, REST APIs, Oracle Fusion Cloud, Agile Scrum

EDUCATION

University of Illinois at Chicago | Master's in Computer Science, Chicago, IL, USA

Aug 2024 – May 2026

Human Computer Interaction, UI/UX Designing, Software Engineering, Secure Web App Development

3.86 GPA

BNM Institute of Education | Bachelor's in Computer Science, Bengaluru, India

Aug 2018 – July 2022

OOPS, DBMS, Computer Architecture, Computer Organization, Data Structures and Algorithms

3.71 GPA

PROJECT AND RESEARCH

Cue - Collaborative Music Rehearsal Platform | University of Illinois at Chicago | [Live Project](#) | [Github Repo](#)

- Built a music rehearsal coordination platform for performers after personally experiencing how unstructured planning made sessions chaotic and inefficient.
- Led end-to-end UX research through user interviews and functional requirement definition, then validated decisions through cognitive walkthroughs with real users.
- Made design decisions grounded in HCI Principles around recognition over recall, progressive disclosure, and error prevention, and iterating through multiple sketch evaluations to balance clarity, minimalism, and cognitive load.
- Developed the platform in React with role-aware workflows and real-time sync through Socket and REST APIs, using spec-driven development with Claude Code.

Hearing the Battle: How Dynamic Game Audio Shapes Gameplay Experience | Independent Research Study | *Research in Progress*

- Conducting an independent UX & HCI research study on how adaptive battle music in Mobile Legends: Bang Bang shapes player emotion and gameplay experience.
- Creating an observational dataset by tracking how the battle BGM changes during gameplay events (kills, enemy wipes, comeback moments) and linking these audio transitions to emotional reactions during matches.
- Bringing a unique research lens as both a long-term ranked player and a trained singer, combining firsthand gameplay experience with sensitivity to how sound, rhythm, and emotion interact during high-stakes moments.
- Exploring how adaptive battle music functions as an unspoken feedback layer that shapes how players feel momentum, pressure, and intensity during matches.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, Tailwind CSS, GraphQL, Socket.IO, Chart.js

AI & Tooling: GitHub Copilot, Prompt Engineering, Specification-Driven Development, LLM API Integration, MCP

Data & Infrastructure: PostgreSQL, Supabase, Firebase, MongoDB, AWS, Docker, Kubernetes, GitHub Actions, Netlify

Security & Testing: RBAC, Input Validation & Sanitization, Rate Limiting, JWT, OAuth2/OIDC, Jest, Usability Testing, A/B Testing, Lighthouse

Design & Research: Figma, Wireframing, HCI, User Interviews, Reflexive Thematic Analysis
