WORK EXPERIENCE

UI Health | Web Developer | Chicago, IL, USA

Sept 2025 – present

- Built and maintained responsive React-based web pages using React for **UIC Medicine's department websites**.
- Developed reusable UI components and page layouts to present clinical, research, and faculty **information** clearly and consistently.
- Improved **page load speed**, **mobile usability**, and **search visibility** by fixing layout issues, optimizing images, and cleaning up page structure.
- Ensured websites worked reliably **across browsers and devices** while releasing **frequent content and UI updates**.

LPS Health | Frontend & Workflow Lead | Internship | Chicago, IL, USA

May 2025 – Aug 2025

- Redesigned** and **rebuilt** the website using React and Tailwind CSS, significantly improving **accessibility** and overall **usability**.
- Built **responsive, mobile-first layouts** and reusable UI components that worked smoothly across phones, tablets, and desktops.
- Improved **page speed** and **search visibility** through Lighthouse audits, SEO fixes, and analytics-driven optimizations.
- Managed **version control** and **deployments** with GitHub and Netlify, allowing fast, low-risk updates.
- Worked closely with **stakeholders** to maintain consistent UX, accessibility, and visual clarity across pages.
- Supported content growth through blog and newsletter pages, **backlink outreach**, and **landing page integrations**.
- Integrated **Stripe Checkout** to enable secure online donations and streamline the payment experience

Oracle | Cloud Analyst (Frontend Developer - Oracle Cloud) | Bengaluru, Karnataka, India

Aug 2022 – June 2024

- Worked on the frontend for Oracle's internal BHE Services dashboard using Visual Builder Studio (VBS), a low-code tool based on **HTML**, **JavaScript**, and **CSS**. Built Redwood-style UI components used across service monitoring tools.
- Created **reusable UI modules** and connected them to backend services using **REST APIs**. Helped reduce development time by 30% and improved how fast data was shown.
- Found and fixed over **200 bugs** before product release using **JIRA** reports and automated test results. This helped reduce post-release bugs by 40%.
- Worked in **Agile sprints** with backend developers and product managers to deliver features on time for Oracle cloud applications.
- Handpicked to support the BHE-HCM team while also working on BHE Services, due to strong VBS (frontend) knowledge. Helped build **key UI features** and completed tasks under tight timelines.
- Received Oracle's "**Employee Recognition Award**" for contributing to the BHE-HCM project while balancing work across multiple teams.

Softora Technologies | Software Developer Intern (Full Stack) | Bengaluru, Karnataka, India

Aug 2021 – Sept 2021

- Built and improved key features like dashboards and forms for the company's internal portal using **JavaScript** on the frontend and **Node.js with Express** on the backend. Created and connected **REST APIs** to support new features.
- Helped redesign the homepage using **Figma** and implemented the new layout. Worked closely with two other interns and tested the changes internally.

EDUCATION

University of Illinois at Chicago | Master's in Computer Science, Chicago, IL, USA

Aug 2024 – May 2026

Software Engineering, Secure Web App Development, UI Designing, HCI, Distributed Systems

3.83 GPA

BNM Institute of Education | Bachelor's in Computer Science, Bengaluru, India

Aug 2018 – July 2022

OOPS, DBMS, Computer Architecture, Computer Organization, Data Structures and Algorithms

3.71 GPA

PROJECTS

National Civil Service Exam Preparation Platform | Personal Project

Jan 2026 – present

- Designing and building a full-stack learning platform for **India's national civil service examination (UPSC)** — a **multi-stage, government selection exam** that evaluates candidates on current affairs, policy, governance, ethics, and analytical writing, with **over one million applicants each year**.
- Developing systems to aggregate real-time news, government updates, and policy content from multiple sources and **transform them into exam-relevant insights**, rather than unstructured information feeds.
- Creating an **issue-based knowledge model** that connects current events with foundational concepts, historical context, and prior exam questions.
- Implementing **personalized learning flows** based on exam stage, subject focus, and user timelines.
- Integrating **SCORM-compatible learning modules** for structured, static content to enable progress tracking with standard **LMS**.

Collaborative Music Rehearsal Platform | University of Illinois at Chicago

Sept 2025 – Dec 2025

- Designed and developed a web interface for a collaborative rehearsal platform optimized for **clarity and ease of use across devices**.
- Built **role-based frontend views** using **conditional rendering** and **state management** giving personalized content for singers, musicians, and managers in real time.
- Implemented interactive UI patterns for reassignment and confirmation workflows, ensuring **immediate visual feedback and clear system status**.
- Conducted **usability testing** and **user interviews** to reduce cognitive load, and improve task completion during live rehearsal scenarios.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Java, Python

Frameworks & Libraries: React, Astro, Tailwind CSS, Framer Motion, Vite, TanStack (Query / Table / Router), Express.js, Django, Jest, Playwright

UI & Styling: Responsive Design, CSS Flexbox & Grid, Component-based Architecture, Design Systems, Accessibility (Semantic HTML, WCAG basics), Cross-browser Compatibility

Testing & Performance: Unit & Component Testing, Lighthouse Performance Optimization, Code Splitting, Lazy Loading, Asset Optimization

Tools & Platforms: Git, GitHub, GitHub Actions (Frontend CI), Figma, Netlify, Postman, Notion, Lighthouse

Core Concepts: UI/UX Design, Interaction Design, Motion Design, Design Thinking, User Testing, Usability Heuristics

Security: HTTPS, JWT Handling, OAuth2/OpenID Connect (Client-side), Input Validation & Sanitization, Basic XSS/CSRF Awareness
