PROFESSIONAL EXPERIENCE

UI Health | Web Developer | Chicago, IL, USA

Sept 2025 – May 2026

- Led frontend development managing a junior engineer, owning technical decisions across a React and Redux multi-system institutional platform covering scheduling, registration, faculty management, and real-time dashboards, serving 100+ daily active users.
- Built an event-driven sync pipeline with Node.js, Celery, & Redis across 5+ systems, processing 1000+ records weekly with 0 downstream errors.
- Migrated 20+ legacy workflows across 20+ pages into React with new ESLint & TypeScript rules, delivering WCAG-compliant interfaces for 300+ faculty & staff & achieving 100% CI/CD pipeline success.
- Built 20+ reusable MUI components across two microfrontend applications, standardizing frontend architecture while improving scalability, maintainability, and performance through efficient data fetching and caching.
- Shipped real-time Chart.js dashboards for department heads to monitor, with memoization & lazy loading, eliminating render bottlenecks.
- Used Claude Code for code generation, debugging, documentation, and navigating codebases while maintaining code quality and delivery speed.
- Mentored a junior engineer through code reviews & pair programming while helping establish frontend development best practices.

LPS Health | Frontend & Workflow Lead | Internship | Chicago, IL, USA

May 2025 – Aug 2025

- Rebuilt a legacy product from scratch as sole developer, shipping a React, Tailwind CSS, Node.js, & PostgreSQL architecture independently in 3 months using GitHub Copilot.
- Improved Lighthouse score from 40 to 80 and reduced page load time by 70% through lazy loading, image optimization, caching, and accessibility-focused frontend improvements.
- Built a 10+ component design system across 2 brands defining color tokens, spacing, & usage rules reused consistently across both platforms.
- Designed & deployed secure REST API endpoints with pagination, caching, SQL query optimization, & rate limiting for event listings, donation workflows, & campaign pages, improving scalability & API reliability under traffic spikes.
- Integrated Sentry for real-time error tracking, achieved 80% Jest coverage, & set up Netlify CI/CD enabling same-day hotfixes.

Oracle | Cloud Analyst (Technical Consultant - Oracle Fusion Cloud) | Bengaluru, Karnataka, India

Aug 2022 – June 2024

- Collaborated directly with client stakeholders (BHE) to gather requirements, clarify workflows, and translate business needs into production-ready enterprise solutions.
- Architected & maintained a standalone REST API middleware service on OCI, coordinating data synchronization across 10+ enterprise integrations between BHE operational systems & Oracle Fusion Cloud.
- Delivered 20+ enterprise-grade Oracle VBS/VBCS components with documented usage rules & design tokens, adopted across 4+ modules & eliminating redundant development effort across cross-functional teams of 10 to 20 developers, QA engineers, & consultants.
- Resolved 100+ prod issues across frontend, middleware, & API layers during Agile Scrum cycles, restoring workflows with minimal disruption.

EDUCATION

University of Illinois at Chicago | Master's in Computer Science, Chicago, IL, USA

Aug 2024 – May 2026

Human Computer Interaction, UI/UX Designing, Software Engineering, Secure Web App Development

3.86 GPA

BNM Institute of Education | Bachelor's in Computer Science, Bengaluru, India

Aug 2018 – July 2022

OOPS, DBMS, Computer Architecture, Computer Organization, Data Structures & Algorithms

3.71 GPA

PROJECT & RESEARCH

Cue - Collaborative Music Rehearsal Platform | University of Illinois at Chicago | [Live Project](#) | [Github Repo](#)

- A real-time collaborative platform for musicians to coordinate rehearsals, manage session roles, & sync practice schedules across performers.
- Ran user interviews, surveys, & competitor analysis, synthesizing findings into personas & empathy maps to define information architecture, navigation flows, & interaction patterns, then validated high-fidelity Figma prototypes through usability testing & cognitive walkthroughs applying HCI principles of recognition over recall, progressive disclosure, & error prevention before writing a single line of code.
- Built the entire TypeScript, React, Node.js, and Supabase platform from scratch, owning architecture decisions around state management, real-time synchronization, testing, scalability, and user experience.

Hearing the Battle: How Dynamic Game Audio Shapes Gameplay Experience | Independent Research Study | *Research in Progress*

Designing an HCI research study and observational dataset to analyze how adaptive battle music in Mobile Legends: Bang Bang affects player emotion, decisions, and game momentum, and to study how sound shapes user experience under pressure.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, Tailwind CSS, GraphQL, Socket.IO, Chart.js, Redux, Context API, TanStack Query, Express.js

AI & Tooling: Claude Code, GitHub Copilot, Prompt Engineering, Specification-based Development, Cursor, MCP, ESLint, Prettier, Git

Data & Infrastructure: PostgreSQL, Supabase, Firebase, MongoDB, Redis, AWS, Docker, Kubernetes, GitHub Actions, Netlify, OCI, CI/CD

Testing: Jest, Sentry, Usability Testing, A/B Testing, Unit Testing, End-to-end Testing, Lighthouse, Debugging, Cross-browser Testing

Security: RBAC, Input Validation & Sanitization, Rate Limiting, JWT, OAuth2/OIDC, Session Management, API Security

Architecture & Systems: REST APIs, Microfrontends, Event-driven Architecture, Distributed Systems, State Management, Real-time Systems, Scalable Web Applications

Design & Research: Figma, Figma AI, Wireframing, HCI, User Interviews, Reflexive Thematic Analysis, Design Systems, Design Tokens, Accessibility (WCAG), Information Architecture, User Flows, Semantic HTML
