WORK EXPERIENCE

UI Health | Web Developer | Chicago, IL, USA

Sept 2025 – present

- Built and maintained responsive React-based web pages using React for **UIC Medicine's department websites**.
- Developed reusable UI components and page layouts to present clinical, research, and faculty **information** clearly and consistently.
- Improved **page load speed**, **mobile usability**, and **search visibility** by fixing layout issues, optimizing images, and cleaning up page structure.
- Ensured websites worked reliably **across browsers and devices** while releasing **frequent content and UI updates**.

LPS Health | Frontend & Workflow Lead | Internship | Chicago, IL, USA

May 2025 – Aug 2025

- Redesigned** and **rebuilt** the website using React and Tailwind CSS, significantly improving **accessibility** and overall **usability**.
- Built **responsive, mobile-first layouts** and reusable UI components that worked smoothly across phones, tablets, and desktops.
- Improved **page speed** and **search visibility** through Lighthouse audits, SEO fixes, and analytics-driven optimizations.
- Managed **version control** and **deployments** with GitHub and Netlify, allowing fast, low-risk updates.
- Worked closely with **stakeholders** to maintain consistent UX, accessibility, and visual clarity across pages.
- Supported content growth through blog and newsletter pages, **backlink outreach**, and **landing page integrations**.
- Integrated **Stripe Checkout** to enable secure online donations and streamline the payment experience

Oracle | Cloud Analyst (Frontend Developer - Oracle Cloud) | Bengaluru, Karnataka, India

Aug 2022 – June 2024

- Worked on the frontend for Oracle's internal BHE Services dashboard using Visual Builder Studio (VBS), a low-code tool based on **HTML, JavaScript, and CSS**. Built Redwood-style UI components used across service monitoring tools.
- Created **reusable UI modules** and connected them to backend services using **REST APIs**. Helped reduce development time by 30% and improved how fast data was shown.
- Found and fixed over **100 bugs** before product release using **JIRA** reports and automated test results. This helped reduce post-release bugs by 40%.
- Worked in **Agile sprints** with backend developers and product managers to deliver features on time for Oracle cloud applications.
- Handpicked to support the BHE-HCM team while also working on BHE Services, due to strong VBS (frontend) knowledge. Helped build **key UI features** and completed tasks under tight timelines.
- Received Oracle's "**Employee Recognition Award**" for contributing to the BHE-HCM project while balancing work across multiple teams.

Softora Technologies | Software Developer Intern (Full Stack) | Bengaluru, Karnataka, India

Aug 2021 – Sept 2021

- Built and improved key features like dashboards and forms for the company's internal portal using **JavaScript** on the frontend and **Node.js with Express** on the backend. Created and connected **REST APIs** to support new features.
- Helped redesign the homepage using **Figma** and implemented the new layout. Worked closely with two other interns and tested the changes internally.

EDUCATION

University of Illinois at Chicago | Master's in Computer Science, Chicago, IL, USA

Aug 2024 – May 2026

Software Engineering, Secure Web App Development, UI Designing, HCI, Distributed Systems

3.83 GPA

BNM Institute of Education | Bachelor's in Computer Science, Bengaluru, India

Aug 2018 – July 2022

OOPS, DBMS, Computer Architecture, Computer Organization, Data Structures and Algorithms

3.71 GPA

PROJECTS

SprintDesk - Agile Sprint Tracker | Personal Project

April 2026 – present

- Building a responsive task management app using **React 19, TypeScript, and Supabase** that lets teams track work across sprint cycles using a drag-and-drop **Kanban board**.
- Designing **real-time sync** so all changes appear instantly across users without needing a page refresh.
- Adding optimistic UI updates that show changes right away and **roll back** automatically if something goes wrong on the server side.
- Building a full **activity log** that records every task change, move, and update so teams can see exactly what happened and when.
- Setting up **per-user data isolation** so each user only sees and interacts with their own tasks and boards.
- Making the app fully **responsive** so it works smoothly on both desktop and mobile screens.

Collaborative Music Rehearsal Platform | University of Illinois at Chicago

Sept 2025 – Dec 2025

- Designed and developed a web interface for a collaborative rehearsal platform optimized for **clarity and ease of use across devices**.
- Built **role-based frontend views** using **conditional rendering** and **state management** giving personalized content for singers, musicians, and managers in real time.
- Implemented interactive UI patterns for reassignment and confirmation workflows, ensuring **immediate visual feedback and clear system status**.
- Conducted **usability testing** and **user interviews** to reduce cognitive load, and improve task completion during live rehearsal scenarios.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript, C/C++, SQL, HTML/CSS

Frontend: React, Astro, Vite, Tailwind CSS, SCSS, Framer Motion, Responsive Design, Component-based Architecture, TanStack

Backend & APIs: Node.js (Express.js), Flask, REST APIs, GraphQL, Socket.IO, Authentication & Authorization (JWT, OAuth2/OIDC)

Databases & Data Stores: PostgreSQL, MySQL, MongoDB, Firebase (Firestore), Redis, ORM/ODM (Sequelize), Supabase

Cloud & DevOps: AWS (EC2, S3, ECS), Docker, Kubernetes, CI/CD (GitHub Actions), Load & Performance Testing (k6)

Testing & Performance: Jest (Unit & Integration Testing), Lighthouse Performance Audits, Caching Strategies, API Performance Optimization

Tools & Platforms: Git, GitHub, Jira, Postman, Netlify, Figma, Adobe Suite, Notion, Oracle VBS/VBCS

Security: HTTPS, JWT Auth, OAuth2/OpenID Connect, Role-Based Access Control (RBAC), Input Validation & Sanitization, Rate Limiting, Hashing
