PROFESSIONAL EXPERIENCE

UI Health | Web Developer | Chicago, IL, USA

Sept 2025 – May 2026

- Owned end-to-end development of a centralized medical event platform supporting 100+ daily active users during peak event periods, partnering with organizational leadership to define product requirements and drive technical decisions.
- Mentored a junior engineer while translating business requirements into scalable event workflows and analytics dashboards for leadership.
- Modernized a legacy frontend by migrating 20+ pages from HTML/CSS/PHP to a React SPA using Redux, TypeScript, and Material UI, delivering WCAG-compliant interfaces used by 300+ faculty, residents, and staff.
- Architected 20+ reusable MUI components that standardized UI development across multiple product modules.
- Improved dashboard responsiveness by memoizing expensive chart data transformations and lazy loading Chart.js visualizations.
- Optimized data fetching with TanStack Query & server-side caching, improving responsiveness & reducing redundant API calls & backend load.
- Automated 1,000+ backend record updates by implementing an event-driven synchronization pipeline using Node.js, Redis, and Celery to synchronize event registrations with institutional faculty, resident, and staff records.
- Used Claude Code to accelerate legacy codebase navigation, debugging, code generation, and documentation, improving development speed.

LPS Health | Frontend & Workflow Lead | Internship | Chicago, IL, USA

May 2025 – Aug 2025

- Rebuilt a legacy healthcare platform in 3 months as the sole developer using React, Tailwind CSS, Node.js, and PostgreSQL to support personalized mentor recommendations, wellness plan purchases, and community initiatives across 2 brands.
- Improved performance by raising Lighthouse scores from 40 to 80, reducing load times by 70% via lazy loading, image optimization & caching.
- Used Google Analytics insights to guide SEO improvements across health articles and campaign pages.
- Accelerated development across 2 brands by building a 10+ component design system with reusable components and standardized design tokens.
- Improved scalability and API reliability by building secure REST APIs using pagination, caching, SQL optimization, and rate limiting.
- Improved reliability and release speed by integrating Sentry, achieving 80% Jest coverage, and setting up Netlify CI/CD.

Oracle | Cloud Analyst (Technical Consultant - Oracle Fusion Cloud) | Bengaluru, Karnataka, India

Aug 2022 – June 2024

- Became an early Oracle VBS specialist by mastering a newly launched platform with limited documentation, contributing across two teams.
- Worked directly with client stakeholders (BHE) to gather requirements and build workflows for CX and HCM applications.
- Accelerated development by delivering 20+ reusable Oracle VBS components with documented usage patterns, adopted across 4+ modules by cross-functional teams of 10–20 developers, QA engineers, and consultants.
- Solved undocumented business requirements by designing workarounds & publishing knowledge articles that enabled reuse for other teams.
- Improved data consistency by architecting an OCI-hosted REST middleware that synchronized data between BHE systems and Oracle Fusion Cloud across 10+ integrations.
- Restored critical business workflows by resolving 100+ production issues in frontend, middleware, and API layers during Agile cycles.

EDUCATION

University of Illinois at Chicago | Master's in Computer Science, Chicago, IL, USA

Aug 2024 – May 2026

Human Computer Interaction, UI/UX Designing, Software Engineering, Secure Web App Development

9.3 GPA

BNM Institute of Education | Bachelor's in Computer Science, Bengaluru, India

Aug 2018 – July 2022

OOPS, DBMS, Computer Architecture, Computer Organization, Data Structures & Algorithms

9.28 GPA

PROJECT & RESEARCH

Cue - Collaborative Music Rehearsal Platform | University of Illinois at Chicago | [Live Project](#) | [Github Repo](#)

- Designed a real-time collaboration platform for musicians by creating user-centered workflows for rehearsal coordination.
- Defined design challenges through user interviews, surveys, and competitor analysis, translating insights into personas, scenarios, & user journeys.
- Explored and refined design concepts through sketching and low-/high-fidelity prototypes.
- Applied HCI principles to shape information architecture and navigation, iteratively refining designs using usability heuristics and the Gulfs of Execution and Evaluation to improve learnability, efficiency, discoverability, and error prevention.
- Validated navigation flows and high-fidelity prototypes through cognitive walkthroughs and heuristic evaluations before implementation.
- Translated UX decisions into a production application using Claude Code with TypeScript, React, Node.js, and Supabase.

Hearing the Battle: How Dynamic Game Audio Shapes Gameplay Experience | Independent Research Study | *Research in Progress*

Investigating how adaptive battle music in Mobile Legends: Bang Bang shapes player emotion, decision-making, and perceived momentum by designing an HCI research framework using observational studies and RTA, informed by experience as both a long-term player and trained singer.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, Tailwind CSS, GraphQL, Socket.IO, Chart.js, Redux, Context API, TanStack, MUI, Express.js

AI & Tooling: Claude Code, GitHub Copilot, Prompt Engineering, Specification-based Development, Cursor, MCP, ESLint, Prettier

Data & Infrastructure: PostgreSQL, Supabase, Firebase, MongoDB, Redis, AWS, Docker, Kubernetes, GitHub Actions, Netlify, OCI, CI/CD

Testing: Jest, Sentry, Usability Testing, A/B Testing, Unit Testing, End-to-end Testing, Lighthouse, Debugging, Cross-browser Testing

Security: RBAC, Input Validation & Sanitization, Rate Limiting, JWT, OAuth2/OIDC, Session Management, API Security

Architecture & Systems: REST APIs, Microfrontends, Event-driven Architecture, Distributed Systems, State Management, Real-time Systems

Design & Research: Figma, Wireframing, HCI, User Interviews, RTA, Design Systems, Design Tokens, Accessibility, Information Architecture,
