PROFESSIONAL SUMMARY

Software Engineer with a strong UI/UX mindset, experienced in building prod-level systems for clinical, academic, and enterprise workflows. Skilled in AI-assisted and specification-driven development to deliver features quickly and reliably. Focused on creating reliable, easy-to-use solutions that keep data consistent and support smooth day-to-day operations, with a focus on usability, product thinking, and practical user experiences.

PROFESSIONAL EXPERIENCE

UI Health | Web Developer | Chicago, IL, USA

Sept 2025 – present

- **Business Overview:** UI Health runs healthcare services and academic programs that depend on schedules, faculty details, residency data, and events being accurate and up to date. The key need is to ensure this information stays consistent across internal systems and public-facing platforms so patients, staff, and students can rely on it.
- **Responsibilities:**
 - Designing and implementing a **scalable content sync system** to keep faculty, residency, and scheduling data consistent across internal systems and CMS platforms, using **REST APIs**, validation, and retry logic; incorporating **MCP-based tools** to support controlled, AI-assisted workflows and reduce manual updates.
 - Building and maintaining **React applications** for clinical (e.g., appointment scheduling) and academic workflows (e.g., residency training) using **spec-based prompting**, enabling users to manage schedules and operational data while ensuring WCAG compliance, accessibility, performance, and cross-browser compatibility.
 - Developing integration layers to connect backend systems, **handling inconsistent data** via validation, transformation, and secure API usage to maintain data integrity.
 - **Improving system reliability** by adding logging, error handling, and retry-safe execution to ensure stable and traceable data workflows.
 - **Documenting** architecture and data flows to support scalability, maintainability, and faster onboarding.
- **Technologies:** React, Node.js, Figma, GitHub Copilot, MCP, REST APIs, WCAG, CMS.

LPS Health | Frontend & Workflow Lead | Internship | Chicago, IL, USA

May 2025 – Aug 2025

- **Business Overview:** LPS Health is a cardiovascular health and wellness platform focused on preventive care and education, relying on digital platforms to deliver content, manage events, and support donation initiatives. The key need is to provide a reliable user experience to improve engagement, program participation, and funding support.
- **Responsibilities:**
 - Led a full-cycle website rebuild within a **3-month timeline**, delivering production-ready features for event registrations, seminars, and donations.
 - Implemented **end-to-end user and payment workflows** using Stripe Checkout, including validation and error handling to ensure secure and reliable transactions.
 - Managed **CI/CD pipelines** using GitHub and Netlify to automate build and deployment processes, enabling faster and more reliable releases.
 - Optimized **frontend performance** through Lighthouse audits and efficient data handling, reducing redundant API calls and improving responsiveness.
 - Added basic **testing** using Jest and **validation** logic to ensure stable user flows.
 - Collaborated with **stakeholders** to define requirements and iterated using **Google Analytics insights** to improve user engagement and conversion.
- **Technologies:** React, Tailwind CSS, Stripe API, Google Analytics, GitHub, Netlify.

Oracle | Cloud Analyst (Frontend Developer - Oracle Fusion Cloud) | Bengaluru, Karnataka, India

Aug 2022 – June 2024

- **Business Overview:** Oracle Fusion Cloud builds enterprise applications that support large-scale business operations. Contributed to two products for Berkshire Hathaway Energy: BHE-HCM (HR platform for payroll, scheduling, employee records, and absence management) and BHE-CX Services (operations platform for field service, work orders, asset maintenance, and inspections), requiring reliable, high-availability systems for critical business workflows.
- **Responsibilities:**
 - Contributed to production-grade enterprise applications as part of an **Agile Scrum team** for BHE-HCM and BHE-CX platforms.
 - Designed and built **Redwood-style UI components** (dashboards, forms, workflow interfaces) using Visual Builder Studio (Oracle's UI development platform) integrated with **Oracle Fusion REST APIs** for payroll, scheduling, and asset management workflows, focusing on usability and performance.
 - Engineered **API integration layers** with data mapping, validation, and error handling to ensure reliable data flow & consistency across distributed systems.
 - Implemented **secure development practices**, including input validation and role-based access considerations to maintain data integrity.
 - Collaborated **cross-functionally** with backend, QA, and product teams to deliver features and support production releases.
 - Ensuring **code quality** through structured code reviews, modular component design, and consistent documentation to support maintainability and team collaboration.
 - Diagnosed and resolved **100+ production bugs** across UI and API layers, and contributed to test coverage using Jest for validating UI behavior and API interactions.
 - Received an **Employee Recognition Award** for rapidly mastering Oracle VBS and being selected as one of the few contributors to support the BHE-HCM product team.
- **Technologies:** Oracle VBS/VBCS, Redwood, JavaScript, HTML, CSS, REST APIs, Oracle Fusion Cloud.

EDUCATION

University of Illinois at Chicago | Master's in Computer Science, Chicago, IL, USA

Aug 2024 – May 2026

Software Engineering, Secure Web App Development, UI Designing, HCI, Distributed Systems

3.83 GPA

BNM Institute of Education | Bachelor's in Computer Science, Bengaluru, India

Aug 2018 – July 2022

OOPS, DBMS, Computer Architecture, Computer Organization, Data Structures and Algorithms

3.71 GPA

PROJECT AND RESEARCH

Cue - Collaborative Music Rehearsal Platform | University of Illinois at Chicago

Sept 2025 – Dec 2025

- **Overview:** As a professional singer who has navigated rehearsal coordination firsthand, built a role-based platform to replace the spreadsheets and group chats music ensembles rely on - to reduce coordination errors and cutting rehearsal downtime.
- **Responsibilities:** Started with **user interviews** to identify coordination gaps, then mapped pain points and designed wireframes and high-fidelity prototypes in **Figma** using **HCI principles**. Translated designs into a role-based **React platform** using **spec-based prompting**. Implemented structured workflows and state management for consistent user interactions. Integrated real-time updates and backend services using **Socket.IO** and **REST APIs**, handling data synchronization, validation, and error states.
- **Technologies:** React, Typescript, Figma, Socket.IO, REST APIs, HCI Principles, Usability Testing

AI and the Future of Education | Reflective Thematic Analysis | University of Illinois at Chicago

Jan 2026 – May 2026

Explored how AI in education reveals both what people hope learning can become and what they fear losing. Found that while some view AI as expanding access and improving learning experiences, others see it as a threat to fairness, human connection, and the role of effort in learning.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS, Framer Motion, SCSS, Astro, Vite, TanStack, GraphQL, Socket.IO

AI & Tooling: GitHub Copilot, Codex, Claude, Prompt Engineering, Specification-Driven Development, LLM API Integration, MCP

Data & Infrastructure: PostgreSQL, Supabase, Firebase, MongoDB, MySQL, Redis, Sequelize, AWS, Docker, Kubernetes, GitHub Actions, Netlify

Security & Testing: RBAC, Input Validation & Sanitization, Rate Limiting, Hashing, HTTPS, JWT, OAuth2/OIDC, Jest, Lighthouse, k6

Design & Research: Figma, Wireframing, Prototyping, HCI, Usability Testing, User Interviews, RTA, Git, GitHub, Jira, Postman, Oracle VBS/VBCS
